Installation or replacement of dust blocks on a patio door

The installation or replacement of the dust blocks on a patio door takes just a few moments and requires no tools.

Step 1

There are 2 dust blocks to be installed on every new patio door, on a new door these should be found in a small pouch attached to one of the door handles.

One goes on the inside as shown below.

Step 2

The second block goes on the out side as shown below.

NOTE: As per the picture below do not install the block too far back, it will still be effective, just more difficult to replace if required.
